Chemistry ~ Ms. Hart
Class: Anions or Cations

## 7.3 - Le Chatelier - Exit Ticket

1. Consider the following equation:

$$
\mathrm{Zn}(\mathrm{~s})+\mathrm{HCl}(\mathrm{aq}) \rightarrow \mathrm{ZnCl}_{2}(\mathrm{aq})+\mathrm{H}_{2}(\mathrm{~g})
$$

What will happen to the concentration of each product or reactant if $\mathrm{ZnCl}_{2}$ is added to the system at equilibrium? Place $a+$ if the concentration will increase and $a-$ if the concentration will decrease.
2. Given the system at equilibrium:

$$
2 \mathrm{POCl}_{3}(\mathrm{~g})+\text { energy } \rightleftharpoons 2 \mathrm{PCl}_{3}(\mathrm{~g})+\mathrm{O}_{2}(\mathrm{~g})
$$

Which changes occur when $\mathrm{O}_{2}(\mathrm{~g})$ is added to this system?
(1) The equilibrium shifts to the right and the concentration of $\mathrm{PCl}_{3}(\mathrm{~g})$ increases.
(2) The equilibrium shifts to the right and the concentration of $\mathrm{PCl}_{3}(\mathrm{~g})$ decreases.
(3) The equilibrium shifts to the left and the concentration of $\mathrm{PCl}_{3}(\mathrm{~g})$ increases.
(4) The equilibrium shifts to the left and the concentration of $\mathrm{PCl}_{3}(\mathrm{~g})$ decreases.
3. Given the reaction at equilibrium:
$\mathrm{N}_{2}(\mathrm{~g})+\mathrm{O}_{2}(\mathrm{~g})+$ energy $\rightleftharpoons 2 \mathrm{NO}(\mathrm{g})$
Which change will result in a decrease in the amount of $\mathrm{NO}(\mathrm{g})$ formed?
(1) decreasing the pressure
(2) decreasing the concentration of $\mathrm{N}_{2}(\mathrm{~g})$
(3) increasing the concentration of $\mathrm{O}_{2}(\mathrm{~g})$
(4) increasing the temperature

(4) The equilibrium shifts to the left and the concentration of $\mathrm{PCl}_{3}(\mathrm{~g})$ decreases.
3. Given the reaction at equilibrium:
$\mathrm{N}_{2}(\mathrm{~g})+\mathrm{O}_{2}(\mathrm{~g})+$ energy $\rightleftharpoons 2 \mathrm{NO}(\mathrm{g})$
Which change will result in a decrease in the amount of NO (g) formed?
(1) decreasing the pressure
(5) decreasing the concentration of $\mathrm{N}_{2}(\mathrm{~g})$
(6) increasing the concentration of $\mathrm{O}_{2}(\mathrm{~g})$
(7) increasing the temperature
