

Name: _____ Date: _____

Chemistry ~ Ms. Hart

Class: _____ Anions or Cations

Unit 2 Flash Cards!

Define matter	Difference between physical and chemical property
Difference physical and chemical change	Explain why phase changes are not chemical changes
Describe the different phase changes	Determine whether a substance is a solid, liquid or gas when given it's current temperature and phase change temperature

Draw a particle diagram for a solid	Draw a particle diagram for a liquid
Draw a particle diagram for a gas	Explain phase changes in terms of changes in energy and intermolecular distance
Distinguish between heat and temperature	Describe the effects of adding a solute on the boiling point and the freezing point
